

Tilting & Swiveling Flat Panel Wall Mount Installation Guide

Model: ETEC EXSS1042

- Forward / backward tilt range: +5 to -15 degrees
- Left to right swivel range: 180 degrees
- Extension range: 2.7" to 8.6"
- Easy installation

- Supports most 10" - 42" Flat Panel TVs
- Maximum weight capacity: 55 lbs.

**For technical assistance or troubleshooting please call
1-855-994-3832 or visit www.sibrandssupport.com**

This product Wall Mount frame is intended for use only with an apparatus which has a maximum weight of 55 lbs. See apparatus instructions. Using with an apparatus heavier than the maximum weight indicated may result in instability and cause possible injury

READ THIS FIRST Read this entire manual! Do not attempt to install this product if you do not understand the instructions. Contact a qualified mount installer if you have any doubts about a safe and secure mount installation, or if you are not sure what specific wall materials you are attaching this mount to. Check all the parts carefully to make sure there are no missing or damaged parts. Improper installation may result in damage to your TV, property, and personal injury.

This product is intended only to mount a television of the indicated size and weight. Using this product to mount televisions heavier than the maximum weight capacity can damage equipment and cause personal injury.

Schoenfeld International Inc. and ETEC are not responsible for personal injury or product damage due to mishandling, incorrect mounting, incorrect assembly, or incorrect use of this product.

CHILD SAFETY

How and where you use your television wall mount is extremely important for Child Safety. As you set up and use your new product, keep all of these safety tips in mind.

- **One size of TV wall mount does not fit all TVs. Use only a TV wall mount rated for the weight of your TV and the size of your screen. Your TV wall mount assembly instructions contains specific information on the maximum weight and screen size combination that your wall mount can safely support. Do not exceed the maximum weight of screen size for any TV wall mount.**
- **Carefully read all of enclosed instructions for proper use of this product. If you have any doubts about safe and secure assembly, please contact a professional.**
- **Don't let children climb on or play with mounts or TVs.**
- **Remember that children can become excited while watching a program, especially on a "larger than life" TV. Make sure to place or install the TV wall mount where it cannot be pushed, pulled on, or knocked down.**
- **Make sure that you route all cords and cables so that they cannot be pulled or grabbed by curious children.**

Always wear safety goggles to when drilling or installing hardware.

Tools

For your convenience, we have included an allen wrench and a socket tool with this mount. For the best assembly experience and mounting safety, we always recommend using full-size tools for each assembly steps.

Below is a recommended tool list you will need for proper and safe installation. See applicable warnings in this manual about certain types of mounting surface materials and the special hardware and tools that should be used.

- **Drill with a specific size drill bit to pre-drill holes in the wall**
- **Stud finder**
- **Tape measure**
- **Pencil**
- **Screw drivers**
- **Socket wrenches**
- **Small hammer**
- **Safety goggles**

Long Bolt

Concrete Anchor

ID	Qty	Description
C	4	M4x12mm bolts
D	4	M5x12mm bolts
E	4	M6x12mm bolts
F	4	M8x25mm bolts
G	4	M4x30mm bolts
H	4	M5x30mm bolts
I	4	M6x35mm bolts
J	4	M8x35mm bolts

ID	Qty	Description
K	4	M5/M6 spacers
L	4	M8 spacers
M	4	10mm spacers
N	8	2.5mm spacers
O	4	M4/M5 washers
P	4	M6 washers
Q	4	M8 washers
R	1	Allen Wrench
S	1	Bubble Level

The actual appearance and quantity of parts may be different than shown in the illustration. Consult the table for actual quantities.

Step 1. Separate the TV Plate & Wall Plate

1. Use the Allen wrench (R) to remove the two M6x12 Bolts and separate the Wall Plate (1) and TV Plate (2) into two pieces as shown in Fig 1.

Fig. 1

Step 2. Install the TV plate on the television.

Do not force the bolts into the mounting holes on your TV. Do not use an electric drill to tighten these bolts on your TV. This could damage the equipment or cause personal injury.

CAUTION: Do not place the TV face down on a hard surface when installing the mounting plate on the TV. Placing the TV face down on a hard surface can result in equipment damage. Use a blanket or other suitable surface.

Use the selected bolts (C-J) and the washers (O-Q) to install the TV Plate (2) to the rear of the TV as shown below in Fig. 2A. Tighten securely using the Allen wrench (R). Do not overtighten.

If the back of the TV is not flat, or if the bolts are too long, it may be necessary to use Spacers (K-N) as shown in the Fig. 2B. Multiple Spacers can be used to reach the proper length.

Fig. 2A

Fig. 2B

Step 3. Find and mark the best position for the wall mount on the wall.

The best viewing height is parallel to the eye level of a person sitting on a couch. Normally, this is about 4 feet above floor level.

In addition to your eye level height when you are seated, the following two measurements will help you determine the perfect height for your wall-mounted television:

- The distance from your viewing location to the wall.
- The vertical distance from eye level to the floor plus the distance from your viewing location to the wall when the viewing angle is 15 degrees.

For example:

- If distance 'a' is 5 to 7 feet (1.5 to 2.1 meters), distance 'b' is about 1 foot (0.3 meter)
- If distance 'a' is 8 to 13 feet (2.4 to 4 meters), distance 'b' is about 3 feet (0.9 meter)
- If distance 'a' is 14 to 17 feet (4.3 to 5.2 meters), distance 'b' is about 4 feet (1.2 meters)

Add the eye level height plus 'b' to get the ideal height of the center of the television display.

Step 4: Attach the wall mount to the wall

After determining the ideal height on the wall for your television, follow the mounting instructions for your type of wall construction: wood stud walls or masonry walls (concrete, brick, or stone).

Attaching this mount to wood or concrete walls requires special tools and hardware to ensure the mount is securely and safely attached to these materials. Brick and concrete will break or crumble if special concrete drill bits and drill operating speeds are not properly used. Consult a professional if you are unsure or have any doubts about the safety of the installation. Personal injury or equipment damage can result if the mount is not properly installed.

Wood Stud Walls

1. Use a pencil, awl, or a nail to mark the location of the wall stud centers (Fig 3a) after locating the stud with an electronic stud locator.
2. Place the wall mount flat against the wall with the center of the mount in the desired location, aligning the holes in the mount with the stud (Fig 3b). Use the wall plate as a template to mark the location of the two mounting holes on the wall. Make sure that the mounting holes are in the exact center of the stud.
3. Use 5/32" (4mm) drill bit to pre-drill holes at least 2.36" inches (60mm) deep at the marked locations.
4. Use a wrench, the two Long Bolts (A) to attach the wall mount to the wall.
Tighten the Long Bolts (A) securely and then loosen each bolt 1/2 turn. Shift the bottom of the wall mount to insure the mount is perfectly level. Tighten the top Long Bolt (A) securely before tightening the bottom Long Bolt (A).

Do not use wall anchors in wood stud walls.

Fig. 3a

Fig. 3b

Fig. 3c

Concrete Walls:

1. Place the wall mount flat against the wall with the center of the mount in the desired location
Use the wall plate as a template to mark the location of the mounting holes on the wall.
2. Use a 3/8" (10mm) drill bit to pre-drill two holes at least 2.36" (60mm) deep (Fig 3d) at the marked locations.
3. Insert a wall anchor (B) into each pre-drilled hole and lightly tap it with a hammer until the wall anchor is flush with the wall.
4. Use a wrench and the two Long Bolts (A) to attach the wall mount to the wall.
Tighten the Long Bolts (A) securely and then loosen each bolt 1/2 turn. Shift the bottom of the wall mount to insure the mount is perfectly level. Tighten the top Long Bolt (A) securely before tightening the bottom Long Bolt (A).

Fig. 3d

Concrete Wall

Step 5: Hang the television

A large television requires two people to lift. Schoenfeld International Inc. and ETEC are not responsible for equipment damage or personal injury due to mishandling.

Do not let go of the TV until you are sure that it is securely mounted. Releasing the TV without first ensuring that it is securely installed can result in equipment damage or personal injury.

1. Lift the television using two people with the bracket assembly already securely attached.
2. Hook the tab on the top of the TV Plate (2) over the top on the front of the Wall Plate (1) arm as shown in Fig. 4.
3. Attach and secure the TV Plate (2) to the Wall Plate (1) with the Allen wrench (R) using the two M6x12mm screws previously removed in Step 1. Turn the screws clockwise to securely tighten.

Fig. 4

Step 6: Adjusting the Tilt

To adjust the Tilt Angle of your TV you may need to loosen the Tilt Adjustment Screw as shown in Fig. 5.

1. Use the Allen Wrench (R) to loosen the Tilt Adjustment Screw about 1/2 turn. Then adjust the Tilt Angle of the TV to your liking.
2. The Tilt Adjustment Screw can be re-tightened if you do not want to make further changes to the Tilt Angle of the TV in the future.

Step 7: Adjusting the Swivel Tension

To adjust how easily the TV Mount can Swivel you may need to loosen the Swivel Adjustment Screw as shown above in Fig. 5.

1. Use the Allen Wrench (R) to loosen the Swivel Adjustment Screw about 1/2 turn.
2. To adjust the swivel angle, simply grab the sides of the TV with two hands and carefully slide the TV in the desired direction. When the TV is in the desired position, carefully let go of the TV.
3. The Swivel Adjustment Screw can be re-tightened if you do not want to make further changes to the Swivel Tension of the TV Mount in the future

Step 8: Adjusting the Rotation

1. If necessary, the TV can be rotated from -5° to $+5^{\circ}$ by adjusting the two screws which connect the Wall Plate (1) to the TV Plate (2) as shown in Fig. 6.
2. To adjust the rotation, loosen these two screws with the Allen wrench (R) about 1/2 turn each, and gently slide the TV Plate (2) to the left or right depending on your needs.
3. Once the TV Plate (2) is in the correct position, re-tighten the screws by turning the Allen wrench (R) clockwise.

LIMITED SIX-YEAR WALL MOUNT WARRANTY

We warrant this product to you, the original purchaser at the time of purchase printed on a dated store receipt from an authorized ETEC retailer and for a period of six-years thereafter that our wall mount product and all its parts and components are free of defects in material and workmanship under normal use. This warranty is subject to the provisions below. ETEC's sole obligation and the purchaser's exclusive remedy pursuant to these warranties are limited to replacement at ETEC's sole discretion. There are no other warranties except as expressly set forth below either expressed or implied, including any warranty of merchantability for any particular purpose.

Should you be missing any of the assembly parts or components (screws, pieces, etc.), please contact the Customer Support Center to secure a replacement. It is not necessary to bring the unit back to the store. When calling, please reference the parts list found in the Instruction Manual to help us accurately identify the missing parts and promptly provide replacements.

For technical support, visit our website www.sibrandssupport.com or call the ETEC Technical Support Center for technical assistance or troubleshooting at 1-855-994-3832, Monday to Saturday, 10:00AM to 7:00PM EST.

This warranty is expressly limited to the replacement of wall mount parts and components described in the parts list located in the Instruction Manual included with the product.

This warranty applies under conditions of normal use.

This warranty does not cover: any product, which has been subject to damage due to improper assembly or disassembly, products which were not assembled, installed, used, or maintained in accordance with the product assembly instructions & warnings, acts of nature, misuse, neglect, accidents, abuse, exposure to elements, outdoor use, extreme temperature ranges, damage during transit, commercial use, modification of, or to any part of the product or attachments to the product not approved by ETEC. Also not covered are costs for assembly/dis-assembly labor, costs incurred in shipping the unit or parts for warranty repair/exchange or any products purchased from unauthorized ETEC sellers. Under no circumstances shall ETEC, be liable for any loss (direct, indirect, incidental, foreseen, unforeseen, special or consequential) or for any damage arising out of, or in connection with, the use of this product. Nor shall ETEC have any responsibility for incidental or consequential damages resulting from the breach of this warranty including but not limited to inconvenience, purchase or rental of replacement products, loss of profits or commercial loss.

We reserve the right to request damaged parts or units be shipped to our offices for inspection or confirmation of any warranty claims.

This warranty does not cover product sold 'As Is'.

This warranty is valid only to the original purchaser of the Product in the United States and Canada and grants specific legal rights.
