of your fingertips.

To install the batteries:

Note: The Manual CodeSearch method may take a longtime because the remote searches through all of the codes in its memory for the code that operates your component. Therefore, if your brand is listed in the Brand Codes or the Code Lists, first try the Brand Code Search or the Direct Code Entry method described. TIP: To exil without saving at any point in the Manual Code Search, press and release the CLEAR key. 1. Manually turn on the component you want the remote to

• To program the DVD • VCR keyto control a VCR, see below. • To program the DVR • AUX keyto control a component other than

control (TV, VCIL DVD, DVR, satellite receiver, or cable box).

2. Press and hold the component key (TV, SAT·DTC, DVD·VCR, DVR·AUX) you wish to program. The LED turns on and remains on. Keep holding down the component key.

3. While holding the component key down, press and hold the POWER key. The LED turns off. After holding down both keys for three seconds, the LED turns back on. 4. Release both keys. The LED remains on.

Note: If you press an invalid key during Manual Code Search, the remote does not respond and the search times out after two minutes, When the search times out, the LED blinks four times and turns off. The last programmed code under that component key is retained. TIP: Throughout the programming of each key, be sure to keep the remote pointed at the IR sensor of the component you are currently programming the remote to control.

5. Repeat step 4 until you have retrieved all four numbers in

the code. After the fourth number is retrieved, the LED

Note: If you press an invalid key during the Code Retrieval process,

the remote will not respond. If you do not press a valid Code Retrieval key (TV, SAT-DTC, DVD-VCR, DVR-AUX, INFO,

CLEAR), Code Retrieval timesout after 15 seconds. The LED
