How to adjust the European adjustable hinges on doors

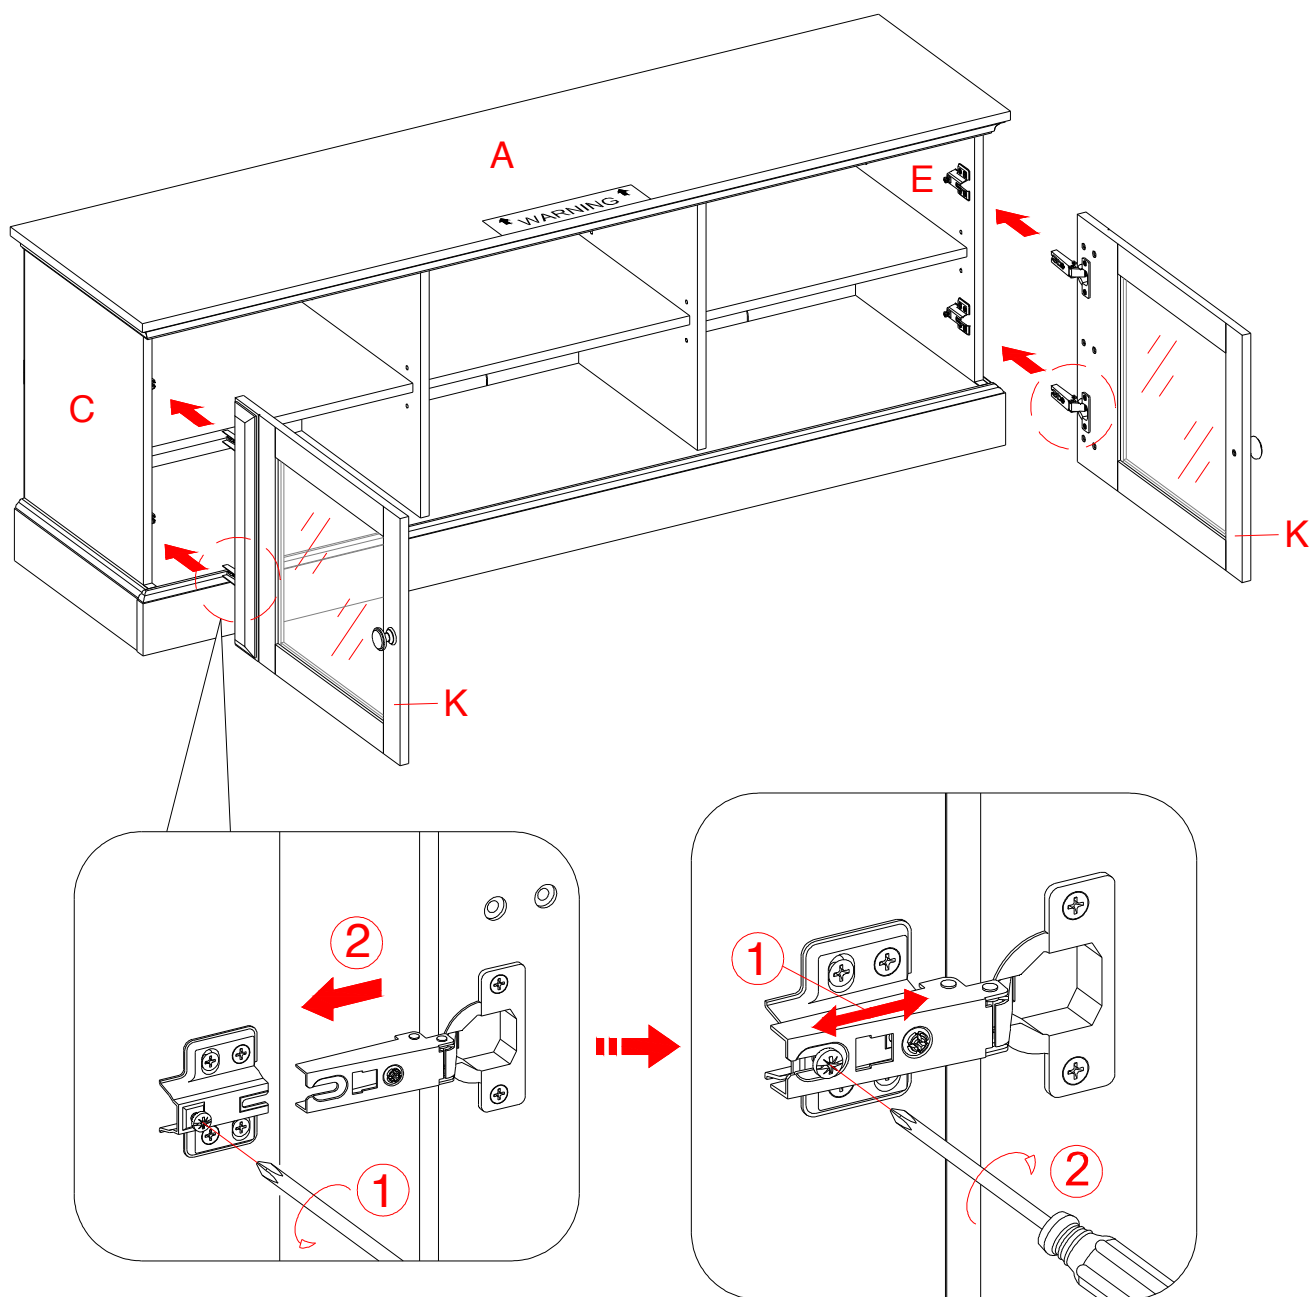

Shipping may cause doors to go out of alignment. If you find that the doors need to be adjusted slightly, turn the appropriate screw, as illustrated below:

1 - TO ADJUST DOOR FORWARD OR BACKWARD.

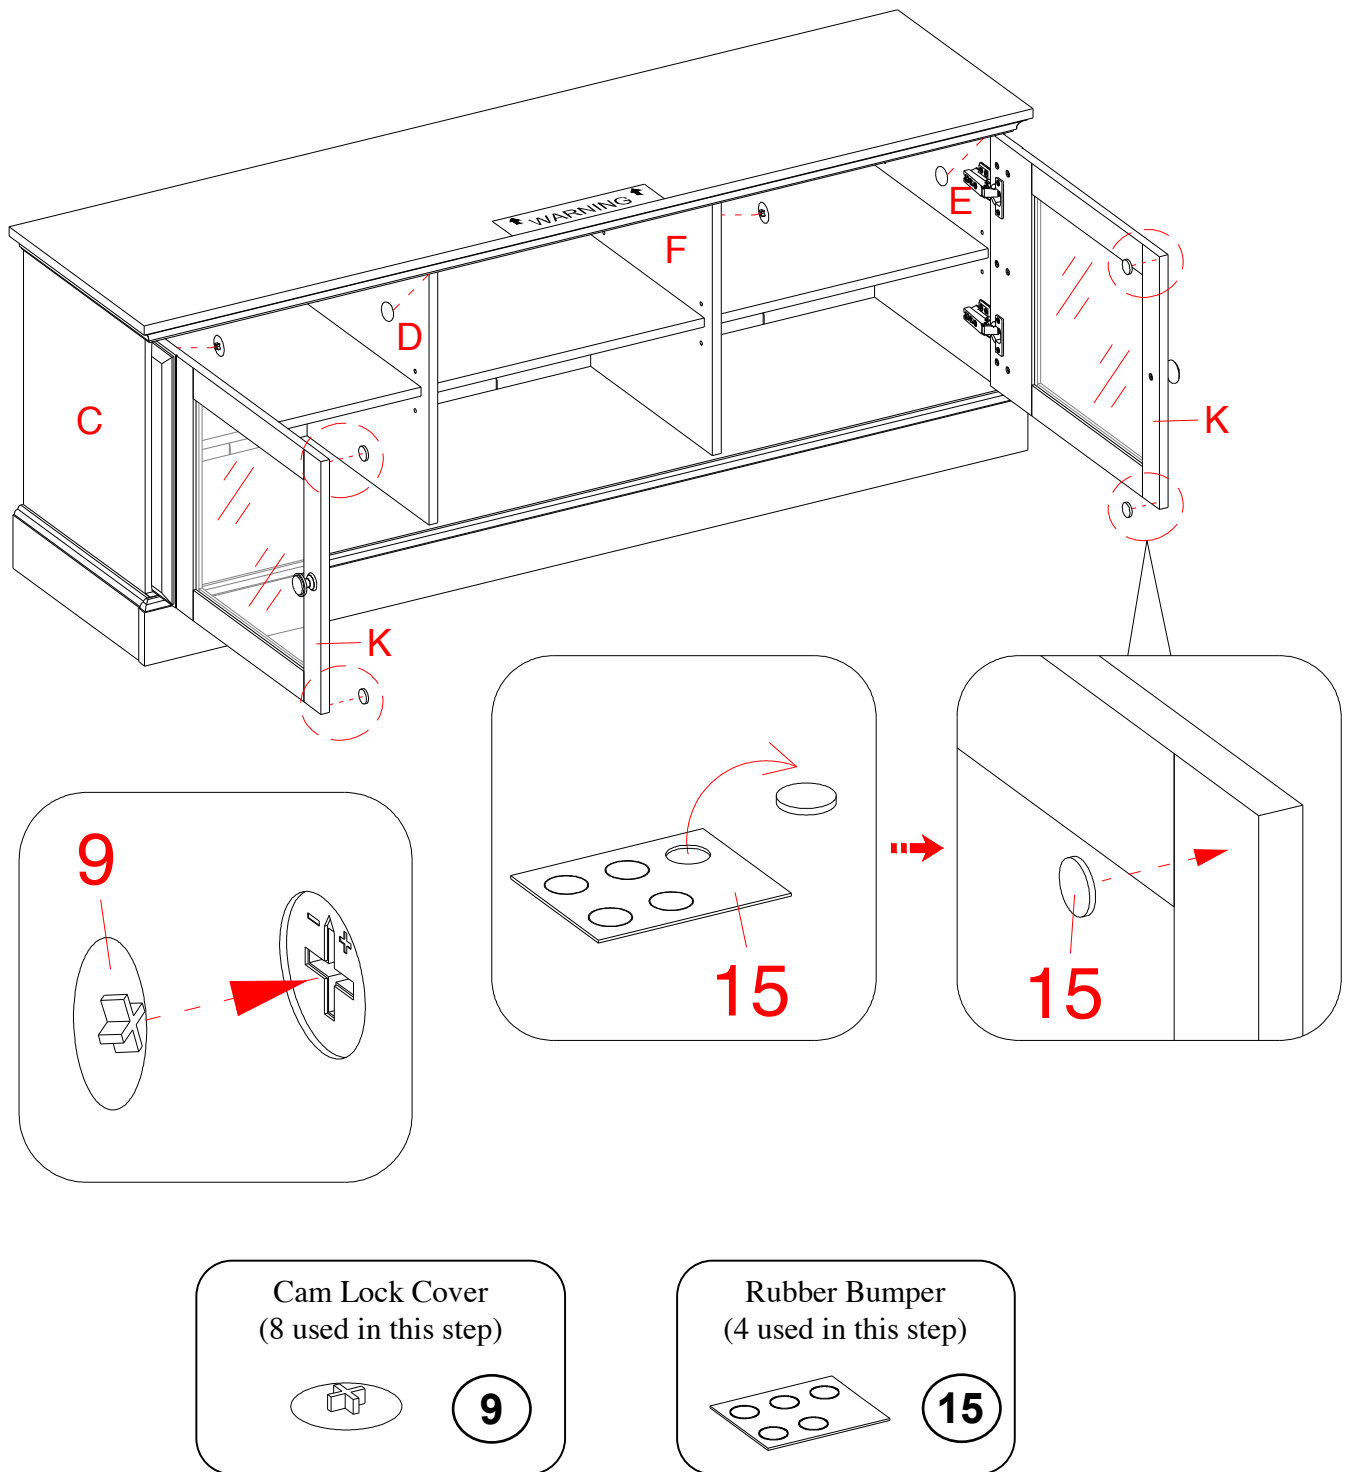

2 - TO ADJUST DOOR TO RIGHT OR TO LEFT.

3 - TO ADJUST DOOR UP OR DOWN.

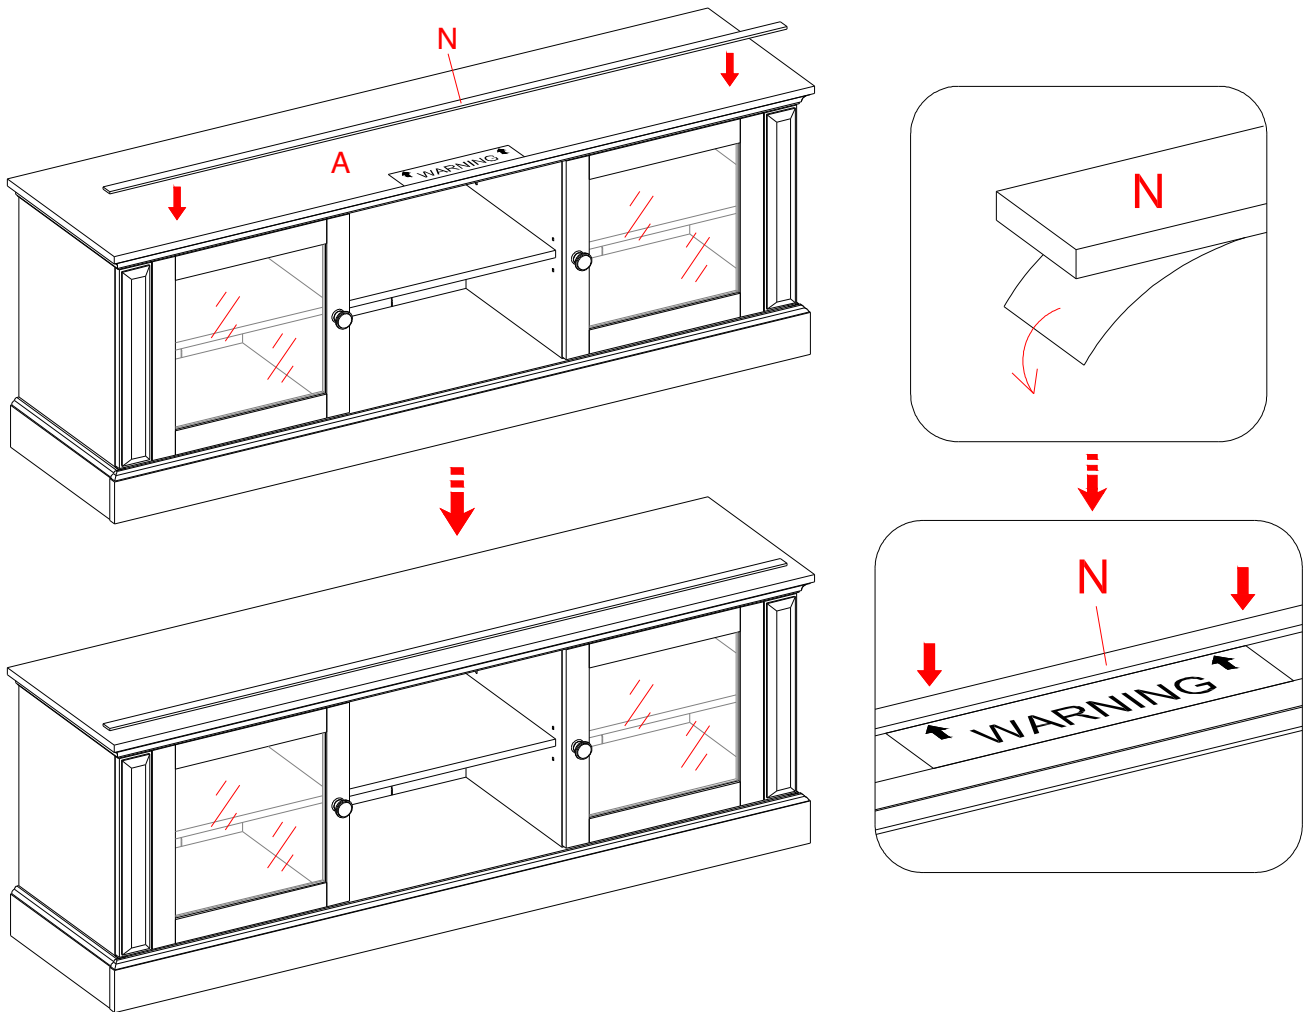

18. Pick up one Door (K) and attach the extended Hinge Arms to the Hinge Bases installed on Left Side Panel (C). Loosen the bolt on the back of Hinge Base for an easy fit. Tighten the bolt on the Hinge Base to lock the hinges in place.
19. Repeat the same procedure to attach the other Door (K) to the Right Side Panel (E).
20. Open and close the doors to make sure they are aligned and shut correctly. If necessary, adjust the screws for a good fit. Refer to the hinge sticker on the door for adjustment.

21. Plug the Cam Lock Covers (9) onto the visible Cams Locks to conceal the Cams.

22. Peel off the Rubber Bumpers (15) from the bumper card and stick them at the outer corners of the Doors (K) where they come in contact with the Partition Panels (D and F).

NOTE: You must install the strip stopper to prevent the TV from tipping when placing your flat panel television directly on the console.

23. Remove the paper backing from the Stop Rail (N), then properly align the Stop Rail with the top edge of the stopper template on the Top Panel (A). Press down on the Stop Rail to help adhesion.
24. Carefully remove the stopper template from the Top Panel (A).
